PROFESSIONAL SUMMARY

Information Systems graduate with hands-on experience in IT support, enterprise systems, and business operations. Experienced in Active Directory, Microsoft 365, Windows environments, SharePoint, Odoo ERP, networking, technical troubleshooting, and digital workflow management. Built an enterprise IT system covering asset management, helpdesk operations, role-based access control, infrastructure monitoring, and IT administration workflows. Seeking opportunities in IT Support, IT Systems, Systems Administration, and enterprise technology.

EDUCATION

Bachelor of Science in Information Systems - University of Bahrain, College of Information Technology | September 2025

TECHNICAL SKILLS

Enterprise Systems: Active Directory, Microsoft 365, SharePoint, Windows Server, Odoo ERP, Role-Based Access Control (RBAC)

IT Support & Networking: Hardware and software troubleshooting, IT ticketing, LAN/WAN, IP addressing, switches, network devices, technical documentation

Data & Analytics: SQL, Microsoft Excel, Power BI

Development: Next.js, React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS

Tools & Design: Git, GitHub, Figma, UI/UX, usability testing

SELECTED PROJECTS

Enterprise IT Asset Management & Helpdesk System | Next.js, React, TypeScript, Tailwind CSS, RBAC

- Designed and built an enterprise IT system inspired by a real asset-tracking challenge identified during an IT internship.
- Built centralized workflows for IT assets, employee assignments, helpdesk tickets, maintenance activities, and operational tracking.
- Implemented role-based access control for IT Admin, IT Support, and Employee users with different permissions and access levels.

Graduation Project - Deerty Platform | Entrepreneurship & Digital Innovation Project - Bahrain | December 2024

- Developed Deerty Platform, a pioneering digital entrepreneurship project in Bahrain designed to improve communication between citizens and government entities.
- Conducted user and market validation with 50+ participants, demonstrating clear user interest and demand for the proposed solution.
- Tested the platform with 50+ users, implemented 5+ improvements based on feedback, and increased user satisfaction by 25%.

PROFESSIONAL EXPERIENCE

HR Assistant - Al Muhaideb National | Dammam, Saudi Arabia | May 2026 - Present

- Manage employee data and large-scale administrative workflows through Odoo ERP and enterprise platforms supporting 1,000+ employees.
- Upload, organize, and maintain employee personnel documents in SharePoint, supporting centralized document management and accurate digital recordkeeping.
- Process and maintain digital employee transactions through QIWA, Muqeem, and Absher, ensuring accurate organizational records.

- Generate operational reports covering document expiry dates, residency status, work permits, visas, and insurance records.
- Manage health insurance operations for 1,000+ employees and dependents, including enrollment, deletion, tier changes, and provider coordination.
- Support payroll-related inputs, deductions, employee documentation, and compliance workflows.
- Collaborated with the IT department on implementing a new employee attendance application, helping translate HR requirements into system workflows and support the rollout for employees.

IT Support Intern - Zamil Plastic Industries | Dammam, Saudi Arabia | July 2025 - August 2025

- Resolved hardware, software, and network support tickets, achieving a 95% resolution rate.
- Reduced average issue resolution time by 20% through proactive troubleshooting and process improvements.
- Managed Active Directory user accounts and access permissions to support secure and accurate user access.
- Configured and supported Microsoft 365 services, including Teams, OneDrive, and email, for 50+ users.
- Installed and configured Windows operating systems based on departmental requirements.
- Created IT workflow process maps and technical documentation to improve consistency and support faster onboarding.
- Supported LAN connectivity, network devices, data center operations, surveillance cameras, and tag-tracking systems.
